FACTORY OF THE YEAR PROJECT AWARD

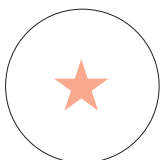

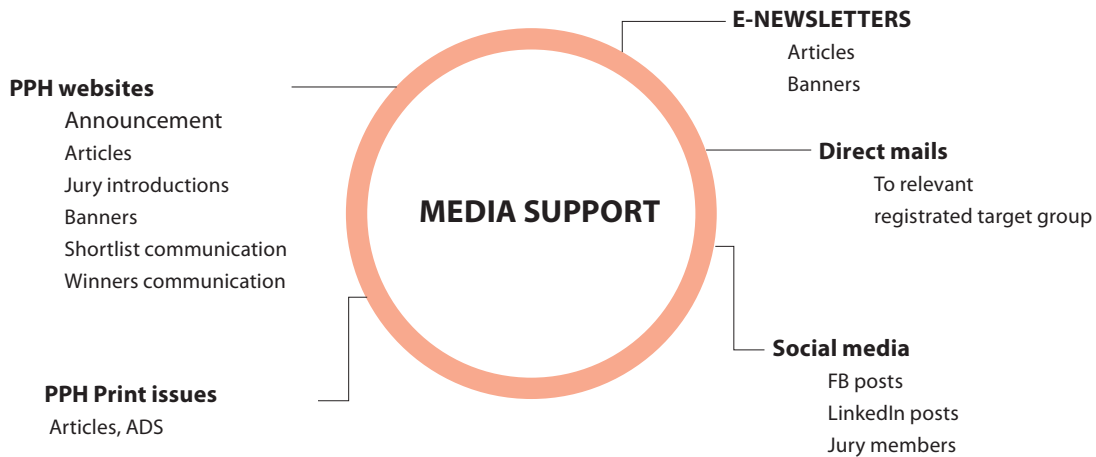

Gyártástrend awards the most innovative manufacturing and production projects in its new competition award. The awarded projects reflect the changed environmental and economic situations and are at the forefront of good practices. They provide an effective response to the current challenges of our time, including the energy crisis, the shortage of raw materials, and the current difficulties in recruiting and retaining the workforce. For all this, digitization, which is gaining more and more ground with the development of technology, Industry 4.0 tools, artificial intelligence, digital twins or 5G and cloud technology, which can make all levels of production more efficient and sustainable, are effectively used.

CATEGORIES

GyártásTrend magazine welcomes entries from industrial companies operating in Hungary in 7 categories. A company can submit an entry in several categories

- **Manufacturing/ production projects of the year**
- **The most innovative projects of the year in manufacturing**
- **Industry Supply Chain Projects of the Year**
- **Dream Team award of the year**
- **HR projects of the year in industry**
- **Sustainability projects of the year in manufacturing**
- **Digitization projects of the year in manufacturing**

MEDIA COMMUNICATION

The sponsorship of the competition provides a unique and exclusive opportunity to appear in Hungary so that our partners can be widely reached by decision-makers in the technology sector.
